
ATLANTICA
SEEDS

About Us

ATLANTICA was established in Antalya in 2017 for the purpose of selling and marketing seeds and biological & biotech products. Our company works with reliable breeders with strong genetic potential on hybrid vegetable seeds with the ATLANTICA SEEDS brand. With its knowledge and experience, it offers quality hybrid vegetable seeds suitable for different soil, climate and market demands to domestic and foreign markets.

Our Mission

With a wide range of products such as tomatoes, peppers, cucumbers, melons, watermelons, zucchini, eggplant, we bring together high-yielding, high-quality, disease-resistant, adaptation tested, high-quality varieties that can compete in the export field, as well as bringing together with our producers, which are important for human and environmental health. to encourage the use of biological and biotechnical products in wider areas.

Our Vision

Our company, which continues to develop its strategic cooperation areas of activity with its strong, competitive and researcher structure, has adopted the principle of open, equal and honest trade.

ATLANTICA SEEDS

invako Endüstriyel Teknoloji A.Ş.

Dry Fog Technology

A modern application solution developed for effective pest control in greenhouses.

Fine-Particle, Dense Dry Fog
Helps reach difficult to access areas.

Powerful Dispersion, Balanced Distribution
Ensures effective coverage throughout the greenhouse.

Application Quality in Every Detail
Provides a more consistent and effective application.

The Right Technology for Controlled Application
Aims to reduce the risk of degradation of active ingredients due to heat.
